Storage Temperature Range	$-65^{\circ}C$ to $+150^{\circ}C$
Power Dissipation ( $P_D$ )	
Dual-In-Line	700 mW

Lead Temperature (Soldering, 10 seconds)	260 $^{\circ}C$

**Note 1:** "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. Except for "Operating Temperature Range" they are not meant to imply that the devices should be operated at these limits. The Electrical Characteristics tables provide conditions for actual device operation.

**Note 2:** This device should not be connected to circuits with power on because high transient voltages may cause permanent damage.
